### **Letters of recommendation**

- Upon request – please send an email to [david@ildam.cz](mailto:david@ildam.cz)

### **Developed tools for EnterpriseOne**

- JdeAnalyzer – simplifies analysis of JDEDEBUG.LOG, provides hierarchy of functions, identifies modified parameters within functions, provides performance information of SQL statements and functions and more, also offers data browsing similar to UTB with more options (special data selection, own sequencing etc)
